## INDEX TO VOLUME 5.

---

### A.

Absolute measurement of resistance, A new method for the, *Edward B. Rosa*, 499.

Advantages of a high spark frequency in radio-telegraphy, *L. W. Austin*, 153.

Apparatus for the testing of transformer steel, 458.

*Austin, L. W.*, A method for producing feebly damped high frequency electrical oscillations for laboratory measurements, 149.

*Austin, L. W.*, Some contact rectifiers of electric currents, 133.

### B.

*Bates, Frederick*, Remarks on the quartz compensating polariscope with adjustable sensibility, 193.

Bessel's functions, Approximate values of, for large arguments, *Louis Cohen*, 227.

*Burgess, George K.*, Methods of obtaining cooling curves, 199.

### C.

Calculation of mutual and self-inductance, Formulæ and tables for the, *Edward B. Rosa* and *Louis Cohen*, 1.

Carbon lamps, A tungsten comparison lamp in the photometry of, *Herbert E. Ives* and *L. R. Woodhull*, 555.

Cell, Weston standard, The temperature formula of, *F. A. Wolff*, 309.

Circuits, coupled, The theory of, *Louis Cohen*, 511.

*Coblentz, W. W.*, Radiation constants of metals, 339.

*Coblentz, W. W.*, Radiation from various solids, 159.

Coefficient of reflection of electrical waves at a transition point, *Louis Cohen*, 549.

*Cohen, Louis, Edward B. Rosa* and, Formulæ and tables for the calculation of mutual and self-inductance, 1.

*Cohen, Louis*, Note on the approximate values of Bessel's functions for large arguments, 227.

*Cohen, Louis*, The influence of terminal apparatus on telephonic transmission, 231.

*Cohen, Louis*, The theory of coupled circuits, 511.

Comparison lamp, Tungsten, in the photometry of carbon lamps, *Herbert E. Ives* and *L. R. Woodhull*, 555.

Compensating polariscope, Quartz, with adjustable sensibility, *Frederick Bates*, 193.

Contact rectifiers of electric currents, *L. W. Austin*, 133.

Converging lenses, A new method of determining the focal length of, *Irwin G. Priest*, 483.

Cooling curves, Methods of obtaining, *George K. Burgess*, 199.

Coupled circuits, The theory of, *Louis Cohen*, 511.

Currents, electric, Some contact rectifiers of, *L. W. Austin*, 133.

Curves, cooling, Methods of obtaining, *George K. Burgess*, 199.

## D.

Dependence of magnetic hysteresis upon wave form, *Morton G. Lloyd*, 381.

## E.

Electric currents, Some contact rectifiers of, *L. W. Austin*, 133.

Electrical oscillations, feebly damped high frequency, A method for producing for laboratory measurements, *L. W. Austin*, 149.

Electrical units, fundamental, to be proposed for international adoption, The principles involved in the selection and definition of, *F. A. Wolff*, 243.

Electrical waves, The coefficient of reflection of, at a transition point, *Louis Cohen*, 549.

Emission spectra of solids on Nernst "Heater tube," 171.

Emissivity, Relation between, and energy consumption, 178.

Energy consumption, Relation between emissivity and, 178.

Errors in magnetic testing with ring specimens, *Morton G. Lloyd*, 435.

## F.

Feebly damped high frequency electrical oscillations for laboratory measurements, A method for producing, *L. W. Austin*, 149.

*Fisher, J. V. S.*, *Morton G. Lloyd* and, The testing of transformer steel, 453.

Flux density, Variation of exponents with, Tables, 469-471.

Focal length of converging lenses, A new method for determining the, *Irwin G. Priest*, 483.

Formula, Temperature, of the Weston standard cell, *F. A. Wolff*, 309.

Formulæ and tables for the calculation of mutual and self-inductance, *Edward B. Rosa* and *Louis Cohen*, 1.

Functions, Bessel's, Approximate values of, for large arguments, *Louis Cohen*, 227.

## H.

High frequency, feebly damped, electrical oscillations for laboratory measurements, A method for producing, *L. W. Austin*, 149.

High spark frequency, Advantages of, in radio-telegraphy, *L. W. Austin*, 153.

Hysteresis, magnetic, Dependence of, upon wave form, *Morton G. Lloyd*, 381.

## I.

Inductance, self-, and mutual, Formulæ and tables for the calculation of, *Edward B. Rosa* and *Louis Cohen*, 1.

Inductance standards, mutual, Different forms of, 507.

Influence of terminal apparatus on telephonic transmission, *Louis Cohen*, 231.

International adoption of electrical units, Principles involved in, *F. A. Wolff*, 243.

*Ives, Herbert E.*, and *L. R. Woodhull*, A tungsten comparison lamp in the photometry of carbon lamps, 555.

## L.

Lamps, carbon, A tungsten comparison lamp in the photometry of, *Herbert E. Ives* and *L. R. Woodhull*, 555.

Lamp, tungsten comparison, in the photometry of carbon lamps, *Herbert E. Ives* and *L. R. Woodhull*, 555.

Lenses, converging, A new method of determining the focal length of, *Irwin G. Priest*, 483.

*Lloyd, Morton G.*, Dependence of magnetic hysteresis upon wave form, 381.

*Lloyd, Morton G.*, Errors in magnetic testing of ring specimens, 435.

*Lloyd, Morton G.*, and *J. V. S. Fisher*, The testing of transformer steel, 453.

Luminous equivalent of radiation, *P. G. Nutting*, 261.

**M.**

- Magnetic hysteresis, Dependence of, upon wave form, *Morton G. Lloyd*, 381.  
 Magnetic testing, Errors in, with ring specimens, *Morton G. Lloyd*, 435.  
 Measurement, absolute, of resistance, A new method for the, *Edward B. Rosa*, 499.  
 Metals, Radiation constants of, *W. W. Coblenz*, 339.  
 Meter, watts-per-candle, A volt scale for, *Herbert E. Ives*, 543.  
 Method, New, of determining the focal length of converging lenses, *Irwin G. Priest*, 483.  
 Method for producing feebly damped high frequency electrical oscillations for laboratory measurements, *L. W. Austin*, 149.  
 Methods of obtaining cooling curves, *George K. Burgess*, 199.  
 Mutual and self-inductance, Formulae and tables for the calculation of, *Edward B. Rosa and Louis Cohen*, 1.

**N.**

- New method for the absolute measurement of resistance, *Edward B. Rosa*, 499.  
 New method of determining the focal length of converging lenses, *Irwin G. Priest*, 483.  
 Note on the approximate values of Bessel's functions for large arguments, 227.  
*Nutting, P. G.*, The luminous equivalent of radiation, 261.

**O.**

- Oscillations, electrical, A method for producing feebly damped high frequency, for laboratory measurements, *L. W. Austin*, 149.

**P.**

- Photometry of carbon lamps, A tungsten comparison lamp in the, *Herbert E. Ives and L. R. Woodhull*, 555.

Polariscope, Quartz compensating, with adjustable sensibility, *Frederick Bates*, 193.

*Priest, Irwin G.*, A new method of determining the focal length of converging lenses, 483.

Principles involved in the selection and definition of the fundamental electrical units to be proposed for international adoption, *F. A. Wolff*, 243.

**Q.**

Quartz compensating polariscope with adjustable sensibility, *Frederick Bates*, 193.

**R.**

Radiation constants of metals, *W. W. Coblenz*, 339.

Radiation from electrically heated solids, 162.

Radiation, The luminous equivalent of, *P. G. Nutting*, 261.

Radiation, Selective, from various solids, *W. W. Coblenz*, 159.

Radio-telegraphy, Advantages of high spark frequency in, *L. W. Austin*, 153.

Rectifiers, Contact, of electric currents, *L. W. Austin*, 133.

Reflection of electrical waves at a transition point, The coefficient of, *Louis Cohen*, 549.

Resistance, A new method for the absolute measurement of, *Edward B. Rosa*, 499.

Resistance, standard, A new form of, *Edward B. Rosa*, 413.

Ring specimens, Errors in magnetic testing with, *Morton G. Lloyd*, 435.

*Rosa, Edward B.*, and *Louis Cohen*, Formulae and tables for the calculation of mutual and self-inductance, 1.

*Rosa, Edward B.*, A new form of standard resistance, 413.

*Rosa, Edward B.*, A new method for the absolute measurement of resistance, 499.

## S.

- Scale, Volt, for a watts-per-candle meter,  
*Herbert E. Ives*, 543.  
Selective radiation from various solids,  
*W. W. Coblenz*, 159.  
Self-inductance, Formulæ and tables for  
the calculation of mutual and,  
*Edward B. Rosa and Louis Cohen*, 1.  
Solids, various, Radiation from, *W. W.  
Coblenz*, 159.  
Some contact rectifiers of electric cur-  
rents, *L. W. Austin*, 133.  
Standard cell, Weston, The temperature  
formula of, *F. A. Wolff*, 309.  
Standard resistance, A new form of,  
*Edward B. Rosa*, 413.  
Steel, transformer, The testing of, *Mor-  
ton G. Lloyd and J. V. S. Fisher*,  
453.

## T.

- Tables, Formulæ and, for the calculation  
of mutual and self-inductance, *Ed-  
ward B. Rosa and Louis Cohen*, 1.  
Telegraphy, radio-, Advantages of a high  
spark frequency in, *L. W. Austin*,  
153.  
Telephonic transmission, Influence of ter-  
minal apparatus on, *Louis Cohen*,  
231.  
Temperature formula for the Weston  
standard cell, *F. A. Wolff*, 309.  
Terminal apparatus, Influence of, on tele-  
phonic transmission, *Louis Cohen*,  
231.  
Testing, magnetic, Errors in, with ring  
specimens, *Morton G. Lloyd*, 435.  
Testing of transformer steel, *Morton G.  
Lloyd and J. V. S. Fisher*, 453.

Theory of coupled circuits, *Louis Cohen*,  
511.

Transformer steel, The testing of, *Morton  
G. Lloyd and J. V. S. Fisher*, 453.  
Transition point, The coefficient of reflec-  
tion of electrical waves at a, *Louis  
Cohen*, 549.

Tungsten comparison lamp in the photo-  
metry of carbon lamps, *Herbert  
E. Ives and L. R. Woodhull*, 555.

## U.

Units, electrical, Principles involved in  
international adoption of, *F. A.  
Wolff*, 243.

## V.

Volt scale for a watts-per-candle meter,  
*Herbert E. Ives*, 543.

## W.

Watts-per-candle meter, A volt scale for,  
*Herbert E. Ives*, 543.

Wave form, Dependence of magnetic hys-  
teresis upon, *Morton G. Lloyd*, 381.

Weston standard cell, The temperature  
formula of, *F. A. Wolff*, 309.

Wireless telegraphy. See Radio-teleg-  
raphy.

*Wolff*, F. A., The principles involved in  
the selection and definition of the  
fundamental electrical units to be  
proposed for international adop-  
tion, 243.

*Wolff*, F. A., The temperature formula of  
the Weston standard cell, 309.

*Woodhull*, L. R., *Herbert E. Ives* and, A  
tungsten comparison lamp in the  
photometry of carbon lamps, 555.

1993
